

MIKAC TECHNOLOGIES LLC

Legacy Application Modernization · Cloud-Native Engineering · Systems Integration

Fishers, Indiana | **Erik Mikac**, Owner & Principal Software Engineer | erik@mikacotech.com | 603-509-8429 | mikacotech.com | UEI C49ACTDVFR63 | CAGE 23RC4

COMPANY OVERVIEW

Mikac Technologies LLC is a veteran-owned software engineering firm serving government and commercial organizations. We replatform aging enterprise applications to cloud-native architectures, build event-driven data platforms, and integrate systems never designed to work together. Work is performed directly by the principal engineer (ten years of software engineering experience, 2016–present), removing the coordination overhead that consumes much of a small contract's value.

CORE COMPETENCIES

- Legacy application modernization and replatforming
 - Custom software and application development
 - Java / Spring Boot enterprise development
 - Cloud-native and microservices architecture
 - Docker and Kubernetes containerization
 - REST API design and systems integration
- Event-driven and high-volume data workflows
 - DevSecOps, CI/CD, and vulnerability remediation
 - Application performance and scalability engineering
 - Automated testing and quality engineering
 - Angular and modern web application development
 - AI-enabled application and workflow integration

TECHNICAL ENVIRONMENT

- Development:** Java, Spring Boot, Spring MVC, REST, JPA/Hibernate, Angular, TypeScript, Python

Cloud & Infrastructure: AWS, Microsoft Azure, Docker, Kubernetes, Helm, serverless
- Data & Integration:** Apache Kafka, Debezium CDC, PostgreSQL, Oracle SQL, Redis, distributed caching

DevSecOps: Jenkins, Maven, GitHub Actions, Azure DevOps, containerized deployment, automated testing

DIFFERENTIATORS

- Direct access to the engineer.** No account manager layer between the client and the person doing the work.

Measured performance engineering. Demonstrated record of locating architectural bottlenecks and redesigning rather than adding hardware.
- Regulated-environment experience.** Delivery in wholesale energy-market and enterprise insurance systems where reliability and compliance are enforced.

Veteran-owned. Founded and operated by a United States Navy veteran (submarine radio operator, 2007–2012); previously held TS/SCI clearance.

PRINCIPAL'S EXPERIENCE

The firm was established in 2026 and has not yet completed a federal contract. The following was delivered by the principal in prior professional roles and is presented as principal's experience, not company past performance. Employer names withheld; figures as measured in production.

- Re-architected an enrollment-validation pipeline using Java virtual threads and container-aware CPU controls, reducing processing time from **~5 minutes to 20 seconds** under Kubernetes.
 - Modernized dashboard state management to a signal-based architecture, cutting load time from **~3 minutes to 30 seconds**.
 - Replaced cross-system security lookups with a synchronized local cache, removing **~10 seconds** of page load latency and eliminating an external runtime dependency.
- Containerized and deployed more than a dozen enterprise applications using Docker, Kubernetes, and Helm.
 - Replaced legacy ingestion pipelines with Debezium change-data-capture against managed PostgreSQL.
 - Remediated hundreds of critical vulnerabilities across Spring Boot services.
 - Governed Kafka event contracts and schema evolution across multiple consuming systems.

COMPANY DATA

Legal name	Mikac Technologies LLC	SDVOSB	VetCert in progress	Certifications	CompTIA Security+; CKAD; Azure AI-102
UEI	C49ACTDVFR63	Primary NAICS	541511	Education	B.S. Computer Science, Indiana University Bloomington
CAGE	23RC4	Add'l NAICS	541512, 541519		
Business type	Small business, veteran-owned	PSC	DA01, D302		

Mikac Technologies LLC is a veteran-owned small business. SBA Service-Disabled Veteran-Owned Small Business certification is in progress and is not yet held; the firm does not represent itself as an eligible SDVOSB concern for set-aside purposes at this time.
